PROFILE

Second-year Computer Science student at Royal Holloway, University of London, with a strong interest in data-driven systems and how software interacts with real-world financial data. Experienced with React, FastAPI, and Python; currently expanding into data analytics through SQL, and exploring tools such as Pandas and NumPy for data manipulation and analysis.

EXPERIENCE

TCS BFSI Data Lab Spring Internship · Hybrid

- Designed and implemented the React front-end for Valora, a financial chatbot providing economic insights and live stock data visualisations.
- Collaborated with a team to present the project to industry professionals.

HSBC Financial Technology Work Experience · Hybrid

- Attended in-person talks at HSBC London on Digital Business Services and Global Trade.
- Organised and presented group research on HSBC's sustainability roles

PROJECTS

Oaxaca · React, FastAPI, SQLite · 2026

A full-stack restaurant management platform built to streamline front-of-house and back-of-house operations. Core features include live order tracking with status updates across roles, dedicated dashboards tailored to kitchen staff, managers, and waiters, and a COGS analytics layer for monitoring food cost margins. Project followed a structured 5-sprint Scrum process - covering planning through to testing.

Valora · React, Python, Figma · 2025

Financial chatbot delivering economic insights with dynamic stock and revenue charts, filtered via dropdown. Solely responsible for the full frontend UI design and development.

How Does Chaos Theory Affect Financial Markets? · EPQ Dissertation · 2024

An in-depth research dissertation examining the application of Chaos Theory to financial markets, analysing two historical market crashes as case studies.
